Quick Word Recognition Grade Placement Test Instructions

Instructions by Dianne Craft, MA, CNHP, www.diannecraft.org

The document below is the Word Recognition test for you to use to informally assess your child’s present reading level. It does not test reading comprehension and fluency, etc., but it gives a fairly accurate, quick way to determine your child’s present reading ability level.

After you have begun using the Daily Lesson Plan for the Struggling Reader, give this test again about every three months, to help you determine how well your reading interventions are working with your child. Our goal is to make a one and a half to two year gain in one year, using the Daily Lesson Plan Guide.

When having your child read the words on the test, if your child has to sound the word out, but it is correct, then do no mark it wrong. The child may not know the words as quickly as you like, but you will be able to see if the skills are there to read the word. Just make a note of that, for you to refer to when you give the test again. I often put a short note on the test (AFTER the child has left the room), noting which words took a L-O-N-G time to sound out. The next time I give the test, I will expect to see that the amount of time needed to read the words will be much less. If a child says a word wrong, but corrects himself, then do not mark it wrong. If you can, it is best to refrain from telling the child the word, since we will be using this test again.

Quick Word Recognition Grade Placement

Grade Placement: If a student reads at least five out of ten words correctly in a column, that is assumed to be the student’s instructional grade level.
